Students will learn to install and configure Citrix XenApp 6.5 for Windows Server 2008 R2, Citrix Receiver and plug-ins, and administrative consoles and tools to configure resources, policies, server and farm settings, printers, virtualized applications.					This course provides learners with the skills necessary to monitor, maintain, optimize and troubleshoot Citrix XenApp 6.5 environments running on Windows Server 2008 R2 software.					Students will learn how to select a desktop delivery model for each user group based on their needs, build proof-of-concept and production XenDesktop environments, assign virtual desktops to users and customize the user experience through policies.

SQL Querying - Level 2 Advanced Querying / \$425					Adobe Acrobat 9.0 - Level 2 / \$395					Adobe Acrobat XI - Part 1 / \$395				
In this course, students will work with advanced queries to manipulate and index tables. Students will also create transactions so that you can choose to save or cancel data entry process.					In this course, students use Adobe® Acrobat® 9.0 Pro to convert technical documents to PDF files, enhance and control PDF content accessibility, customize PDF documents for interactive use online, and prepare PDFs for commercial printing.					Students will learn the power of the Portable Document Format. Taking advantage of the functionality and features available in Acrobat, students will ensure the integrity of electronic documents for any viewer, on any devices, or operating systems.

CompTIA Security+ Certification (2011 Objectives) / \$2,475					EC Council Disaster Recovery / \$3,395					ITIL Foundations 2011 Edition				
The CompTIA® Security+® (2011 Objectives) course is designed to help you prepare for the SY0-301 exam. Students will implement and monitor security on networks, applications, and operating systems, and respond to security breaches.					In this course, students learn about the design, management, and implementation of network security in corporations and public networks, and service provision to public and private networks.					This course covers the latest version of core ITIL best practices presented from a lifecycle perspective. The course introduces the principles and core elements of IT service management (ITSM) based on ITIL 2011 Edition.

Access 2007 - Level 2 / \$550					Access 2010 - Level 2 / \$249					Access 2010 - Part 1 / \$600				
In this course, students will create complex Access databases by structuring existing data, writing advanced queries, working with macros, making effective use of forms and reports, and also by performing database maintenance. (Second Edition)					Students will learn how to normalize data, manage table relationships, and enforce referential integrity; work with Lookup fields and subdatasheets; create join queries, calculated fields, and summary values; add objects to forms and create advanced forms.					In this course, you will learn how to use Access 2010 to manage your data, including creating a new database, constructing tables, designing forms and reports, and creating queries to join, filter, and sort data.

Excel 2007 - Level 3 / \$300					Excel 2007 - VBA / \$325					Excel 2007 Programming with VBA / \$1,050				
In this course, students will learn how to automate common tasks, apply advanced analysis techniques to more complex data sets, collaborate on worksheets with others, and share Excel data with other applications. (Second Edition)					In this course, students will apply the Visual Basic for Applications (VBA) programming language to simplify many of the tasks that you can perform using various tools and functions in Excel 2007.					In this course, students will learn to use VBA to help analyze information, spot trends, and access critical information more easily.

Excel 2010 - Level 2 / \$199					Excel 2010 - Level 3 / \$250					Excel 2010 - Part 1 / \$300				
Students will learn how to use multiple worksheets and workbooks efficiently, and they will start working with more advanced formatting options including styles, themes, and backgrounds. They will also learn how to create outlines and subtotals, how to create and apply cell names, and how to work with tables. Students will save workbooks as Web pages, insert and edit hyperlinks, and learn to share workbooks by email. This course also covers advanced charting techniques, use of trendlines and sparklines, worksheet auditing and protection, file sharing and merging, and workbook templates. Finally, students will learn to work with PivotTables and PivotCharts.					Students will work with advanced formulas, as well as lookup functions such as VLOOKUP, MATCH, and INDEX. In addition, students will learn about data validation and database functions such as DSUM. They will learn how to import and export data, and how to query external databases. Finally, students will learn about the analytical features of Excel (such as Goal Seek and Solver), running and recording macros, SmartArt graphics, and conditional formatting with graphics.					In this course, students will use Microsoft® Office Excel® 2010 to create spreadsheets and workbooks that they can use to store, manipulate, and share data.

20337 Enterprise Voice and Online Services with Microsoft Lync Server 2013 / \$3,236					20414 Implementing an Advanced Server Infrastructure / \$2,500					20415 Implementing a Desktop Infrastructure / \$2,495				
Students will gain the knowledge and skills to configure and manage a Lync Server 2013 on premises, in the cloud or in a mixed deployment.					In this course, students will learn how to plan and implement some of the more advanced features available in Windows Server 2012.					This course provides guidance on planning and deploying desktops by using several technologies such as User State Migration Tool (USMT), Microsoft Deployment Toolkit (MDT), Virtual Desktop Infrastructure (VDI), and more.

Students will gain the knowledge and skills to maintain a Microsoft SQL Server 2012 database. The course focuses on teaching individuals how to use SQL Server 2012 product features and tools related to maintaining a database.					Students will learn logical table design, indexing and query plans, as well as the creation of database objects including views, and stored procedures, along with parameters, and functions. Also covered is procedure coding.					Students will learn how to create a data warehouse with SQL Server 2012, implement ETL with SQL Server Integration Services, and validate and cleanse data with SQL Server Data Quality Services and SQL Server Master Data Services.

6418 Deploying Windows Server 2008 / \$1,497					6419 Configuring, Managing, and Maintaining Windows Server 2008 Servers / \$2,495					6420 Fundamentals of Windows Server 2008 / \$2,375					
This course provides students with an understanding of migrating and deploying Windows Server 2008 R2. You will learn how to automate server deployment, as well as provide guidelines, best practices that will help you migrate to Windows Server 2008 R2.					This course combines five days worth of training content from the Network Infrastructure Technology Specialist, Active Directory Technology Specialist, and IT Professional Server Administrator courses of Windows Server 2008.					This course introduces network infrastructure and application platform concepts and configurations provided by Window Server 2008. Students will be able to acquire a fundamental understanding in order to pursue advanced topics.
